

ABOUT US

OpenRice started in Hong Kong since 1999 as a rate-and-review platform for gourmets to freely express views and opinions; facilitating millions of monthly unique users exploring their dining needs. Reviews of different perspectives and trillions of big-data elements contribute collective wisdom. OpenRice endeavors to bring a better dining experience and redefine dining enjoyment with up-to-the-minute information and innovative technology. OpenRice has been kept transforming into a multi-purpose platform, taking table reservations, accepting takeaway orders, selling dining vouchers, and processing electronic payments for restaurants, serving millions of registered members.

We believe culinary pleasures transcend geographical boundaries. OpenRice has expanded its regional coverage to Macau, China, Taiwan, Japan, Singapore, Malaysia, and Thailand to make a whole new tight-knit community for food and travel lovers with an All-in-One dining-guide App!
